RICCA has been the leading name in high quality pH Buffer and Conductivity Standards for the last 50 years. We are proud to offer our VeriSpec® line of Certified Reference Materials (CRMs) for pH Buffer and Conductivity Standards. Our ISO 17025 and 17034 Accreditations provide the highest level of quality assurance. These products have undergone rigorous evaluations of manufacturing methods, quality control, stability, and homogeneity. As a result, a certificate with the specified property value, uncertainty, and traceability is available with every bottle. All three of our quality control laboratories are now accredited to ISO/IEC 17025 for competence in laboratory testing and ISO 17034 for competence of reference material producers.
