

Avian Influenza Neuraminidase Antibody

CATALOG NUMBER: 3423

Specifications

Host Species	Rabbit
Species Reactivity	Virus
Immunogen	Avian influenza neuraminidase antibody was raised against a synthetic peptide corresponding to 15 amino acids near the carboxy terminus of the avian influenza neuraminidase protein. Efforts were made to use relatively conserved regions as the antigen. The immunogen is located within the last 50 amino acids of Avian Influenza Neuraminidase.
Conjugate	Unconjugated
Tested Applications	ELISA
User Note	Optimal dilutions for each application to be determined by the researcher.

Properties

Purification	Avian Influenza Neuraminidase Antibody is affinity chromatography purified via peptide column.
Clonality	Polyclonal
Isotype	IgG
Physical State	Liquid
Buffer	Avian Influenza Neuraminidase Antibody is supplied in PBS containing 0.02% sodium azide.
Concentration	1 mg/mL
Storage Conditions	Avian Influenza Neuraminidase antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Disclaimer

Disclaimer	Optimal dilutions/concentrations should be determined by the end user. The information provided is intended for research use only. For additional information, visit ProSci's Terms and Conditions Page .
